Customized Application Development

Learning Management System (LMS)

Objective: An eLearning platform that caters people with different learning styles and comprehension abilities on any device, anytime and anywhere. This application was implemented for a reputed educational institution and for a non-profit organization.

Implementation:

- Modern, chic, easily adaptable user interface
- Engaging courses structuring and material design
- Attendance tracking
- Mentor and Mentee interaction

Impact/Benefits:

- This application makes learning accessible to anyone from anywhere at anytime
- This provides relevant and engaging eLearning content
- This application has reported to improve mentor and mentee interaction, which in turn increased the success rate of the mentee
- This has also showed significant increase in class enrollment

Reporting tool

Objective: A software application for a parachurch organization that can manage the creation and sharing of reports within the organization. This organization conducts leadership training, strategic planning and resourcing – this organization has a reach across small villages, towns to global audiences.

Implementation:

- Intuitive and easy to use tool
- Extraction of data from the database and present it in charts, tables and graphs
- Ability to drill down into report data for further analysis
- Exporting and printing of reports

Impact/Benefits:

- Organization gained the benefit of having reliable and accurate information presentation which helped them in making informed decisions and to identify strengths and weaknesses of their own procedures and processes.
- Improved the management of internal process and systems

Mobile TV Application

Objective: Mobile application for a well-known parachurch organization that can stream a TV channel continuously, accepts submission forms and online donation. This organization has regular attendance of 1000 people.

Implementation:

- Modern and User-friendly UI
- Online streaming of the TV channel
- Built in video library, submission form and online donation

Impact/Benefits:

- The TV channel was available for viewing only to the people with cable connection and a TV set before, now it is made available to larger audience
- The application is easily accessible on any kind of device
- The organization has attracted more viewership and has also built its brand and reach through it

Employment Procurement System

Objective: A secure platform and database for job seekers and employees to find relevant jobs postings and find right candidate to their requirements respectively with no cost.

Implementation:

- Modern and User-friendly portal
- No cost to post vacancies or for applying
- Reliable tracking of the applications and interviews stages
- Secure and confidential usage of client data

Impact/Benefits:

- Most of the job portals require membership fee or subscription fee to post company's vacancies, this application is at no-cost which encouraged the employers and seekers to be more engaged online
- The application is easily accessible on any kind of device and from anywhere
- Promise of Security of their data of job seekers and employers has inspired trust on the organization
- Tracking interface of applications and interview stages has kept the the job seekers and employers well informed about their status

CRM & ERP

We are in the process of developing an Enterprise Application which CRM and EPR implementation for widely recognized and reputed parachurch organization. In this project we are implementing

- HR module which will support job posting, applications and hiring process
- CRM which will help managing member-related information in a centralized system
- ERP which will handle all their business functions of day-to-day operations in a centralized and integrated system

Content Management System

We have designed and developed numerous Content Management System (CMS). We do Comprehensive website planning, design, and development. Our website projects range in size, scope, and complexity, yet share a professional user experience that engages visitors with compelling messaging and intuitive functionality.

Our CMS clientele include

- Renowned Parachurch organizations
- Reputed Educational Institutions
- Noted NGOs & Non-Profit organizations
- Prominent Church's

Some of these organizations never had internet presence before. We get involved with clients from the initial project inception, brainstorm with them to gather their requirements then share our knowledge and expertise and eventually offer solutions that's fits their needs.

In addition to CMS, we also implemented Ecommerce platform for a Pizza store.

Consulting

We offer Software Consulting Services to the organizations who are in need of guidance at any point in their product development cycle.

Our Consulting clientele include

- Noted DISC personality profiling organization
- Cloud-based video communication application
- Renowned parachurch organization
- Widely-recognized group of church's

We provide consulting, understanding their needs and problems, proposing the solution, overseeing the development process and finally handing over the application
